## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group II in the reply filed on July 07, 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 1-11 and 15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 07, 2008.

### ***Claim Rejections - 35 USC § 112***

3. Claims 12-14 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 12 and 14, the term "substituted" is indefinite as to scope and meaning.

In claims 12 and 14, the metes and bounds of a caprolactone "derivative" are indeterminate in scope.

In claim 14, "obtainable" is indefinite as to scope and meaning.

### ***Claim Rejections - 35 USC § 102/103***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1796

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 12-14 and 16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. 4,981,696 (Loomis et al).

Loomis et al disclose optically active enantiomers (chiral) lactide copolymers comprising segments of lactide with segments of non-lactide comonomers. Examples of suitable non-lactide comonomers include lactones, such as caprolactone (column 5, lines 45-68).

The reference exemplifies optically active enantiomers comprising lactide segments and caprolactone segments (e.g., example 17). It is reasonably believed that said copolymers would meet the presently claimed chiral block copolymers both in terms of the types of materials used and molecular weight ratios. The onus is shifted to applicants to establish that the product of the present claims is not the same as or obvious from that set forth by the reference.

As regards claims 13 and 16, it is reasonably believed that the reference copolymers would necessarily meet the presently claimed molecular weight ratios as seen by the molecular weights Mw and Mn per Table XI, etc.
